

Errata Sheet

This Errata Sheet contains corrections or changes made after the publication of this manual.

Product Family: DL205

Date: 11 April 2019

Manual Number: H2-WPLC-M

Revision and Date: 4th Edition; May 2011

Change to Page 1-3

Currently States:

“The operating system is resident in the module and does not require battery back-up. The user program is backed by a five-year lithium battery”.

Change to:

The operating system and the user program are written to FLASH memory and do not require battery back-up. The battery is used to hold the retentive memory while the PLC is powered off. There is also a super-capacitor on-board that will hold the retentive memory while the battery is being changed.
