

HLM HLM-SS Operating Instructions

APPLICATION:

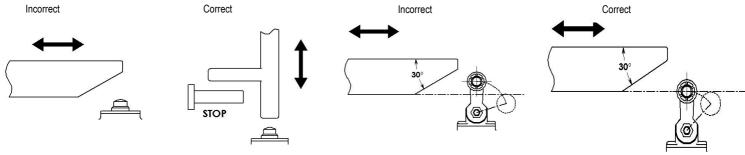

IDEM Limit switches are designed to be mounted for position sensing of moving applications e.g. guard doors, conveyors, machine beds, elevators etc. They are available with linear plungers, rotary levers or roller plungers and either slow or snap action contacts. All contact blocks are positively operated to satisfy IEC 60947-5-1.

Operation of the switches is achieved by a sliding actuation of the moving object to cause deflection of the switch plungers or levers. For safety applications it is important that the moving object does not pass completely over the switch actuators so as to cause the actuator to return to its original position.

Installation Guide: Correct Mounting of Limit Switches is critical to obtain optimum performance and ensure safety reliability.

Installation of all switches must be in accordance with a risk assessment for the individual application. Installation must only be carried out by competent personnel and in accordance with these instructions.

- Never use the switch as a mechanical stop. Ensure that the actuator is protected from mechanical shock.
- For switches with Linear actuators the actuating direction and force from the moving object should be applied in line with the axis of the plunger.
- For switches with Rotary actuators or rollers the operating cam from the moving object should be designed such that the switch is never operated beyond its over travel position. Always use a 30 degree tapered actuating cam.

- Always ensure that when running electrical conductors that they are routed correctly and no damage can occur to the cable insulation.
- Always use M5 mounting bolts and ensure 2Nm tightening torque for robust fitting.
- Ensure 1Nm tightening torque for conduit plugs and cable glands to achieve IP rating.

 The safety functions and mechanics must be tested regularly. For applications were infrequent guard access is foreseeable, the system must have a manual function test to detect a possible accumulation of faults. At least once per month for PLe Cat3/4 or once per year for PLd Cat3 (ISO13849-1). Where possible it is recommended that the control system of the machine demands and monitors these tests, and stops or prevents the machine from starting if the test is not done. (See ISO14119).

Maintenance:

Check switch actuator and body for signs of mechanical damage and wear. Replace any switch showing damage.

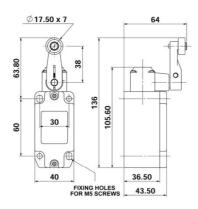

Every 6 Months: Isolate power and remove cover. Check screw terminal tightness and check for signs of moisture ingress. Never attempt to repair any switch.

Contact Block Options:

Safety Classification and Reliability Data:

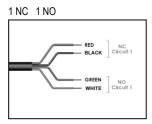

Mechanical Reliability B10d	2.5 x 10 ⁶ operations at 100mA load
ISO 13849-1	Up to PLe depending upon system architecture
Safety Data – Annual Usage	8 cycles per hour / 24 hours per day / 365 days
	MTTFd 356 years

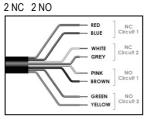

Technical Specification:

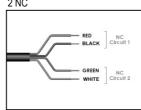

Conforming to standards	ISO14119 IEC 947-5-1 UL508 EN50041 ISO13849-1
Comorning to standards	13014113 IEC 347-3-1 OE300 EN30041 13013043-1
Positive Opening Operation (NC Contacts)	Linear Types 18N. Rotary Types 0.4Nm. Spring Lever Types 2N.
Utilization Category	AC15 A300 240V. 3A.
Min Current	5V, 5mA, DC
Thermal Current (Ith)	10A
Rated Impulse Withstand Volt	2500VAC

Case Material	HLM (Die Cast Painted Red) HLM-SS (Stainless Steel 316)	
Enclosure Protection	HLM IP67 HLM-SS IP67 / IP69K	
Operating Temperature	Min25°C Max 80°C	
Mechanical Life Expectancy	2,500,000 Cycles	
Vibration	IEC 68-2-6, 10-55Hz 0.35mm	
Conductor size	1.5 sq.mm	

Pre-Wired EX versions:

9 10	41 / 42 or 43 / 44
12	Earth

INFORMATION FOR UL 508:

Type 1 Enclosures

Use 16 - 12AWG copper conductors, rated 75°C minimum.

Intended for same polarity use.

Electrical Rating: A300 240V.ac 3A. (6,000 cycles)

240V. 10A. carry only. Wire range: 16AWG – 12AWG Copper Torque 7lb/in (0.8Nm) Earth bonding terminal inside enclosure if required.

WARNING: DO NOT DEFEAT, TAMPER, OR BYPASS THE SAFETY FUNCTION.

FAILURE TO DO SO CAN RESULT IN DEATH OR SERIOUS INJURY.

AVERTISSMENT: NE PAS DESACTIVER, MODIFIER, RETIRER, OU CONTOURNER CETI INTERVERROUILLAGE IL PEUT EN RESULTER DES
