How to Combine Sounds (BD-_AE)

Items prepared by customer: SD card (type: SDV-2GP, sold separately), Personal computer, SD card reader/writer
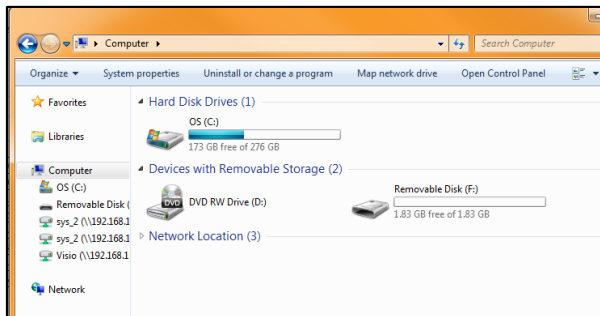

Note: SD card must be formatted in FAT12 or FAT16

## 1   CREATING THE SOUND COMBINATION DATA

- Connect SD card reader/writer to PC and insert SD card

- Open the drive into which the SD card is inserted

- Right click in the opened window. Navigate to New. Create a new Text Document

- Change the name of the document to OTO-LIST.txt

   o Use half size upper- or lowercase letters for the name. If the extension ".txt" is not displayed when the text document is created, change the file name to OTO-LIST

- In the text document enter the value of the sound you want. Save the file. Eject the SD card.

2   TRANSFERRING THE SOUND COMBINATION DATA

- Turn off power to the product
- Open the front cover by sliding down the front cover of the product
- Insert prepared SD card
- Turn on power to the product
- Sound data transfer is complete when you hear a high-pitched tone.
    - o The writing completes in 1 second or less

        Note: If you hear a high pitched tone repeatedly or no sound at all, the writing was unsuccessful.

Note: if the volume control is set to the minimum, you will not hear the sound of completion.

- Set the group selection to "P" and confirm sound is correct on each channel

- Remove SD card when finished. Close cover.
