RHINO PSH-xx-120 Power Supplies
Installation Instructions

READ INSTRUCTIONS BEFORE INSTALLING OR OPERATING THIS DEVICE. KEEP FOR FUTURE REFERENCE.

Safety Instructions and Warnings

- Do not open the device!
- Before any installation or maintenance, ensure that the main switch is switched off and prevented from being switched on again.
- The device must be installed and put into service by qualified personnel only.
- Never work on the device if power is applied.
- Risk of electric arcs and electrical shock, which can cause death, severe personal injury or substantial property damage.
- The unit must be connected to the mains supply in compliance with national regulations (e.g., VDE0100 and EN50178). All wire strands must be fastened in the terminal blocks. (Potential danger of contact with the case.)
- All input and output wires must be properly rated for the power supply and must be connected with the correct polarity (Fig. 3).
- The Power Supply wiring must be sufficiently fused.
- Sufficient cooling must be ensured (Fig. 2).
- Do not introduce any objects into the device.
- The output voltage adjustment potentiometer may only be actuated using an insulated screwdriver.
- Keep away from fire and water.
- The internal fuse is not accessible. If this internal fuse has blown, the power supply has an internal defect and, for safety reasons, must be replaced.
- This device is designed for use in a clean, dry environment.
- The device must be mounted in an enclosure in the end application and must not be accessible in operation.

Installation Instructions

- The device can be mounted onto 35mm DIN rails, compliant with the specifications of DIN EN 50022. Observe the requirements for ventilation space above and below the device (Fig. 2).
- The standard mounting orientation is with input terminals at the bottom.
- Alternative side-mounting for flat panels: The case offers the potentially useful feature to fix the DIN-rail clip to the side wall to mount inside flat panels.

Recycling

- The device contains elements that are suitable for recycling, and components that need special disposal. You are therefore requested to make sure that the device will be recycled at the end of its service life.

Notes for Technical Specifications Table:

1. Output voltage can be adjusted as indicated. However, output power has to be maintained at nominal value. This means the output nominal current has to be reduced in accordance with the increase of output voltage.
2. In case of an internal error, a second voltage regulation loop keeps the output voltage at a safe level, and the power supply turns off and restarts after 10 seconds.
3. When external voltage is supplied above set output voltage and below OVP threshold, the power supply will function normally without switch off or destruction, even if external voltage is applied continuously.
4. In case of overload or short circuit, the unit switches the output voltage off after 4 seconds and tries to restart every 10 seconds.

Technical Specifications

		PSH-12-120	PSH-24-120	PSH-48-120
Input (AC)				
Nominal Input Voltage		100–240 VAC		
Nominal Input Current		1.5–0.78 A		
Operational Input Voltage Range		85–264 VAC		
Input Voltage Frequency Range		45–65 Hz		
Inrush Current (115/230 VAC)		15/30 A		
Standby Power Consumption		2.2/2.2 W (115/230 VAC)		
Active Power Factor Correction (PFC)		0.97/0.8 (115/230 VAC)		
Harmonic limits – acc. EN 61000-3-2		Class A, D		
Circuit Breaker Rating / Characteristic		6-16 A /B, C (IEC); 20 A /B, C (USA)		
Output (DC)				
Max. Output Power		120W		
Output Voltage		12V	24V	48V
Max. Output Current / Max. Output Current 4s ("Boost power" which facilitates the activation of stepper motors, solenoids or actuators)		10A	5A	2.5 A
Output Voltage Adjustment Range		11.8–15 V	23.5–28 V	47.5–56 V
Typical Efficiency (230 VAC)		94%	94%	94%
Regulation Input Variation Load Variation		0.1 % max. (10–90 %) 0.5 % max.		
Output Power Derating - Temperature		2%/K above 60°C, refer to Fig. 5		
Output Power Derating - Input Voltage		3%/V below 90 VAC, refer to Fig. 4		
Hold-up time		20 ms min.		
Start-up time		2s max.		
Ripple and Noise (20MHz bandwidth) (Note 1)		100 mVp-p max.	100 mVp-p max.	200 mVp-p max.
Output Overvoltage Protection (OVP) (Note 2)		16–19V	32–35V	56–60V
Power Back Immunity (Note 3)		< OVP level		
Operation Nominal Operation Peak Power Operation Constant Current (CC)		100% of Iout nominal 105–150% of Iout nominal 155% of Iout nominal		
Duty Cycle (for peak and cc mode) (Note 4) Threshold CC or Peak Operation Timer Normal Operation / Off Period		> 105 % 4s max. (switch off) < 10s typ (automatic restart after switch off or peak and cc operation timer reset)		
Short Circuit Protection		Switch off after 4s delay, automatic restart (Note 4)		
DC OK Signal	Threshold for Vout	ON: > 10.9 V typ. OFF: < 10.7 V typ.	ON: > 22.5 V typ. OFF: < 21.5 V typ.	ON: > 45V typ. OFF: < 43V typ.
	DC ON	Relay contact closed, max. 1A, < 100mOhm, also indicated by green LED		
	DC OFF	Relay contact open, max 30V		
General Data				
Weight		461g [16.26 oz]		
Leakage Current (max.)		0.9 mA		
Network Configuration		TN-S, TN-C, TT, IT		
Enclosure Material (Chassis/Cover)		Aluminum / Stainless Steel		
Cooling		Convection cooling, no internal fan		
Over Temperature Protection		Switch off at over temperature		
Isolation Voltage		Input/Output 4250VDC Input/Chassis 1500VDC Output/Chassis 750VDC		
Creepage Clearance		Input/Output 8mm Input/Chassis 4mm Output/Chassis 1.5 mm		
Safety / Environmental				
Surrounding Ambient Temperature Range		-40°C to +70°C [-40°F to +158°F]		
Temperature Coefficient		0.02 %/K		
Humidity		5–95%, non-condensing		
Storage Temperature		-40°C to +85°C [-40°F to +185°F]		
Maximum Altitude		2000m		
Safety Standards		Information technology equipment IEC/EN 60950-1, UL 60950-1 CSA 22.2 No 60950-1-03, File E198298 Safety low voltage switchgear and controlgear UL 508, File E197592 Process Control Equipment Haz Loc, File E502478 ATEX ⟨Ex⟩ II 3 G Ex ec nC IIC T4 Gcw		
MTBF (acc. to IEC 61709 at 25°C)		> 1,450,000 hrs		
Protection Class		Class I		
Degree of Protection		IP20		
Electromagnetic compatibility (EMC)				
Emissions		EN 61000-6-3, EN 61204-3
