Typical Application Notes

5.1 General connection / wiring diagram

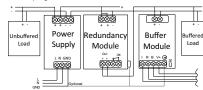

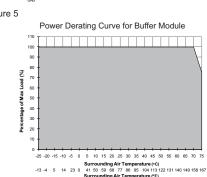

(2)

#### 5.3 Decoupling of buffered branches

#### 1. Safety instructions

- Switch main power off before connecting or disconnecting the device to prevent danger of explosion. • To guarantee sufficient convection cooling, please keep a distance of 50 mm (1.97 in) above and below the device as
  - well as lateral distance of 20 mm (0.79 in) to other units.
  - · Please note, that the enclosure of the device can become very hot depending on on the ambient temperature and load of the power supply. Risk of burns!
- The main power must be turned off before connecting or disconnecting wires to the terminals!
- Do not introduce any objects into the unit!
- Dangerous voltage present for at least 5 minutes after disconnecting all sources of power.
- The supply of the unit shall comply with any isolated secondary circuit according to UL508, Clause 32 • The unit must be installed in an IP54 enclosure or cabinet in the final installation. The enclosure or
- cabinet must comply with EN60079-0 or EN60079-15. · Warning: Explosion Hazard - Substitution of components may impair suitability for Class I, Division 2.
- Warning: Explosion Hazard Do not disconnect equipment or adjust switch unless the power has been switched off or the area is known to be non-hazardous.
- CAUTION: "For use in a controlled environment"
- 2. Device description (Fig. 1)
  - (1) Input / Output terminal block connector
  - (2) Signal terminal block connector
  - (3) Select switch (operation mode)
  - (4) LED display status

(5) 35mm DIN rail mounting (DIN rail sold separately)

3. Mounting (Fig. 2)

The unit can be mounted on 35 mm DIN rail in accordance with EN60715.

The device should be installed with input / output terminal block at the top.

#### Each device is delivered ready to install.

Snap onto the DIN rail as shown in Fig. 2: 1. Tilt the unit slightly upwards and put it onto the DIN rail.

- 2. Push downwards until stopped.
- 3. Press against the bottom front side for locking
- Tug on the unit slightly to ensure that it is secured.
- 4. Dismounting (Fig. 3)

To uninstall, pull or slide down the latch as shown in Fig. 3. Then, slide the unit in the opposite direction, release the latch and pull out the unit from the rail.

#### 5. Connection (Fig. 4)

The terminal block connectors allow easy and fast wiring. The terminal block is IP20 compliant thus provides the user safety and protection from electrical shock hazards.

You can use flexible (stranded wire) or solid wire with the following cross sections:

TABLE 1

| Refer to Fig. 1: | Stranded / Solid |       | Torque |       |
|------------------|------------------|-------|--------|-------|
|                  | (mm²)            | (AWG) | Nm     | lb in |
| (1)              | 3.3-5.3          | 12-10 | 0.72   | 6.3   |
| (2)              | 0.21-5.3         | 24-10 | 0.72   | 6.3   |

secure reliable and shock proof connections, the stripping length should be 7 mm [0.28 in] (see Fig. 4 (1)). Please sure that wires are fully inserted into the connecting terminals as shown in Fig. 4 (2).

accordance to EN 60950 / UL 60950, flexible wires require ferrules.

e appropriate copper wire that is designed to sustain operating temperature of at least

1. At least 60°C / 75°C (140°F / 167°F) or more to fulfill UL requirements.

2. At least 90°C [194°F] for Canada.

#### 6. Typical Application (Fig. 5)

- 5.1. General connection / wiring diagram
- 5.2. Paralleling of buffer units
- 5.3. Decoupling of buffered branches
- 5.4. General signals wiring

Risk of electrical shock, fire, personal injury or death.

- (1) Turn power off before working on the device.
- (2) Make sure the wiring is correct by following all local and national codes.
- (3) Do not modify or repair the unit.
- (4) Use caution to prevent any foreign objects from entering into the housing.
- (5) Do not use in wet locations.
  - (6) Do not use the unit in area where moisture or condensation can be expected.
- 6. Connectable Power Supplies

PSB24-060-P

The buffer module is recommended to be connected with the following power supplies:

| PSB24-060    | PSB24-120    | PSB24-240    | PSB24-480    |
|--------------|--------------|--------------|--------------|
| PSB24-060S-3 | PSB24-120S-3 | PSB24-240S-3 | PSB24-480S-3 |
| PSB24-060S   | PSB24-120S   | PSB24-240S   | PSB24-480S   |

# Technical Data For PSB24-BFM20S

| Input (DC)   |   |  |  |
|--|---|--|--|
| Nominal input voltage  | 24 VDC  |  |  |
| Voltage range  | 22.8-28.8 VDC   |  |  |
| Maximum input voltage  | 35 VDC  |  |  |
| Maximum signal input (inhibit)                                 | 35V / 10mA  |  |  |
| Input current  | Charging mode: < 0.6A [25°C (77°F)]; Discharging mode: 20A max  |  |  |
| Inrush current max. (cold start)                               | <20A [25°C (77°F)]  |  |  |
| Buffer time  | 250 ms min @ 20A load: 5 sec min @ 1A load  |  |  |
| Output (DC)  |   |  |  |
| Nominal output voltage   | 24 VDC typ. (depends on V <sub>in</sub> )   |  |  |
| Adjustment range of the voltage                                | 22-28 VDC (Switch = "Fix 22V" buffering starts if terminal voltage falls below 22V);<br>(Factory setting: Switch = "V <sub>in</sub> - 1V" buffering starts if terminal voltage is decreased by > 1V)  |  |  |
| Maximum output voltage   | 35 VDC  |  |  |
| Output current   | Max 20A   |  |  |
| Connection in parallel   | Yes   |  |  |
| Connection in series   | No  |  |  |
|  | >70°C (5% / °C)   |  |  |
| Derating   | <pre>&gt;/0 ( (3% / C)<br/>&lt; 200mVpp (Buffering mode at V<sub>in</sub> nom. I<sub>n</sub> max)</pre>   |  |  |
| Residual ripple (20MHz) (at nominal voltage)                   |   |  |  |
| Maximum signal output  | 35V / 10mA  |  |  |
| Protective device  | TVS for signals   |  |  |
| Short circuit  | No damage   |  |  |
| General Data   |   |  |  |
| Type of housing  | Aluminum  |  |  |
| Signals  | Green LED Off = Unit is discharged or $V_{in} < 22$ VDC; Green LED On = Unit is fully charged Green LED Flashes Slowly (1Hz) = Unit is charging; Green LED Flashes Quickly (10Hz) = Unit is discharging   |  |  |
| MTBF   | > 800,000 hrs.as per Telcordia @ 25°C (77°F) ambient and stand by mode (buffer module in ready state)   |  |  |
| Dimensions (L x W x H)   | 121 mm x 70 mm x 120.1 mm [4.76 in x 2.76 in x 4.73 in]   |  |  |
| Weight   | 0.76 kg [1.68 lb]   |  |  |
| Connection method  | Screw connection  |  |  |
| Wire size / torque   | See Table 1   |  |  |
| Stripping length   | 7 mm [0.28 in]  |  |  |
| Ambient Operating temperature                                  | -25°C to +75°C [-25°F to +167°F], (Refer to Fig. 6)   |  |  |
| Storage temperature  | -25°C to +85°C [-25°F to +176°F]  |  |  |
| Humidity at +25°C [77°F], no condensation                      | <95 % RH non-condensing per IEC 68-2-2, 68-2-3, protection from moisture & condensation   |  |  |
| Vibration (non-operating)                                      | 10 to 500Hz, 30m/s <sup>2</sup> (3G peak); displacement of 0.35mm; 60 min per axis for all X, Y, Z directions Refer to IEC60068-2-6. Note: all fig-<br>ures quoted are amplitudes (peak values)   |  |  |
| Shock (in all directions)                                      | 30G (300m/s <sup>2</sup> ) in all directions according to IEC60068-2-27   |  |  |
| Pollution degree   | 2   |  |  |
| Altitude (operating)   | 2500 Meters   |  |  |
| Certification and Standards                                    |   |  |  |
