

Adapter Plates for Disconnect Enclosures

Operator Adapter Plates

- Used on all Wiegmann disconnect enclosures with universal flange cutouts
- An operator adapter plate is required to install a disconnect in all Wiegmann WA series enclosures with a universal cutout.
- Operator adapters include an adapter plate and additional parts used to interlock the master door with the disconnect operating mechanism. Panel drilling and installation instructions are furnished with each adapter.
- Each brand and type of disconnect requires a different operator adapter. It is important to select the proper operator adapter and enclosure for the disconnect that you have selected.

Blank Adapter Plates

- These adapter plates are used to cover flange cutouts in disconnect enclosures when disconnects are not installed. This greatly increases the versatility of the disconnect enclosures, enabling them to also be used as regular Type 12 enclosures.
- Wiegmann blank adapter plates are made from heavy gauge steel, with oil-resistant gasket to maintain the dust-tight and oil-tight qualities of the enclosure.
- All blank adapter plates are painted ANSI 61 gray polyester powder.
- All necessary mounting hardware and instructions are included.

Enclosure Accessories

JIC and NEMA swing-out panel kits

- Designed to allow mounting of switches, pilot lights and other components near the front of the enclosure for easy access or meter reading
- These kits consist of heavy-gauge brackets and hinges, which are easily installed by drilling small holes in the sides of the enclosure and bolting the bracket in place
- Sealed washers are also furnished to ensure that the enclosure will meet the original NEMA rating after installation.
- These kits are designed for use with standard Wiegmann JIC and NEMA panels. They do not work with N412xxxC Ultimate Enclosures.
