## 3P Series Molded Case Circuit Breakers Overview

## Overview

Designed to provide branch and feeder circuit protection in industrial control panels, this line of Molded Case Circuit Breakers supplies protection against overload in conductors and short circuit in connected equipment such as motors. They are UL listed for installation in UL 508 control panels. Their small size, in relation to standard circuit breakers or other comparable devices, saves panel space. Four frame sizes and all standard accessories are available.

## Features

- UL489 listed performance for branch circuit overcurrent protection and disconnecting means
- Patented contact conductor designs featuring high-speed "blow-open" action, providing superior performance when high level fault currents produce extra-ordinary electromechanical forces
- Advanced arc extinguishing technology
- Toggle handle provides three positions (on/off/tripped) along with visual indicators
- Manufactured in ISO 9000 certified facilities
- HACR (heating, air conditioning and refrigeration) rated
- G-Frame and F-Frame breakers are suitable for reverse feed
- K-Frame and L-Frame breakers include 3-pole adjustable magnetic trip.

## Auxiliary Contact

The auxiliary contact provides circuit breaker contact status information by monitoring the position of the molded cross bar which contains the moving contact arms. The auxiliary switch is used for remote indication and interlock system verification, and consists of one SPDT switch housed in a plug-in module. Each SPDT switch has one ' $a$ ' and one ' $b$ ' contact. When the circuit breaker contacts are open, the ' $a$ ' contact is open and the ' $b$ ' contact is closed.

Note: Field installable auxiliary contacts are not available for the G and F frame breakers.
For $G$ and $F$ frame auxiliary contacts, order breakers with .AUX as part of the part number. Please see $G$ and F-frame sections for available selections.

## NEMA 12 Safety Door Hardware

Type C361 door interlocking safety handle kits are designed for use with AutomationDirect $3 P$ series MCCBs and flexible handle when mounted in an SDN12, or equivalent, enclosure. These handles secure the SDN12 enclosure, protecting against unauthorized entry while the MCCB is in the ON position. Use them on enclosures with right-side flanges only and material thickness from 16 gauge through $3 / 16 \mathrm{in}$. All mounting hardware is included for enclosures up to 40in [ 101.6 cm ] tall. The addition of the C361KR roller kit is necessary for enclosures taller than 40in [101.6 cm ] that require a 3-point latch. See SDN12 Enclosures section for enclosure specifications.
