## PX-549 – Eight Inputs/ Eight Outputs 24VDC Discrete Terminal

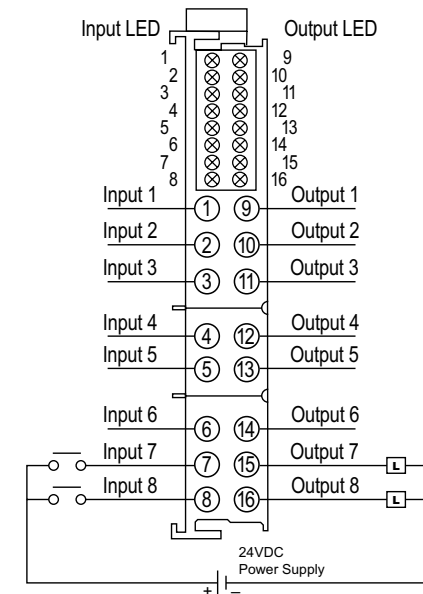

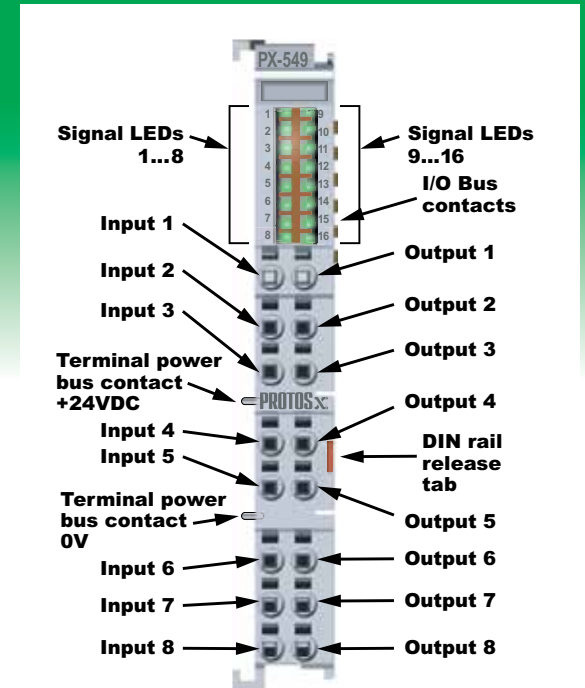

The PX-549 DC Input/Output Terminal provides eight 24VDC inputs and eight 24VDC outputs at 0.5A per point, reverse polarity protection and LED status. Use with the Protos X<sup>TM</sup> I/O System.

Protos X<sup>TM</sup> is a trademark of Automationdirect.com Incorporated

Sales 800-633-0405

PX-549 I/O General Specifications	
Inputs/Outputs per Terminal	8 sinking inputs / 8 sourcing outputs
Data Bytes Used	1-byte (inputs) / 1-byte (outputs)
Input/Output Power Source	Requires external 24VDC power source
Operating Voltage Rating	24VDC (-15%/+20%)
Current Consumption (from I/O Bus)	Typ. 25mA
Current Consumption (from Terminal Power Bus)	Typ. 15mA + load
PX-549 Input Specifications	
Peak Voltage Rating	30VDC
On Voltage Level	15 to 30 VDC
Off Voltage Level	-3 to +5 VDC
Minimum On Current	2mA
Maximum Off Current	40µA
Current Consumption (from I/O Bus)	Typ. 3mA
Off/On Response	3ms
On /Off Response	3ms
PX-549 Output Specifications	
Max. Load Current per Output	0.5A (Short Circuit Protected)
On Voltage Drop	0.14VDC @ 2A
Maximum Leakage Current	5µA
Maximum Inrush Current	2A
Maximum Short-circuit voltage	45V
Load Type	Resistive, inductive, lamp
Reverse Voltage Protection	Yes
Off/On Response	50µs
On /Off Response	75µs
PX-549 Terminal Specifications	
Electrical Isolation	500Vms (I/O bus/field potential)
Heat Dissipation	1W max
Adjacent Mounting on Bus Terminals with Power Contact	Yes, DC only
Adjacent Mounting on Bus Terminals without Power Contact	No
Passes Terminal Bus Power	Yes
Passes PE Bus	No
Status Indicators	8 input and 8 output, indicates on
General Specifications	
Operating Temperature	32° to 131°F (0° to 55°C)
Storage Temperature	13° to 185°F (-25° to 85°C)
Relative Humidity	5% to 95%, non-condensing
Environment Air	No corrosive gases permitted
Mounting/Orientation Restrictions	35mm DIN rail/None
Vibration	conforms to EN 60068-2-6
Shock	conforms to EN 60068-2-27, EN 60068-2-29
Noise Immunity	conforms to EN 61000-6-2/ EN61000-6-4
Protection Class	IP20
Weight	60g
Dimensions (WxHxD)	12 x 100 x 68.8 mm (0.47 x 3.94 x 2.71 in)
Agency Approvals	UL File No. E157382, CE

Connect power supply common (-) to same common as terminal power bus

## MOUNTING

For system assembly, first attach a bus coupler by snapping onto 35mm DIN rail and securing into position using the DIN rail locking wheel (where applicable) located on the left side of the coupler. To add a bus terminal, insert unit onto right side of bus coupler using the tongue and groove at the top and bottom of the unit, pressing gently until it snaps onto the DIN rail. A proper connection cannot be made by sliding the units together on the DIN rail. When correctly installed, no significant gap can be seen between the attached units. Bus connection is made through the six slide contacts located on the upper right side of the units. Add up to 64 bus terminals per bus coupler, including a bus end terminal.

**Insert unit using tongue and groove molded guide and press gently until it becomes firmly seated on DIN rail.**

**Where applicable, rotate Locking Wheel to lock Bus Coupler**

## REMOVAL

A locking mechanism prevents individual units from being pulled off. For bus terminal removal, pull the orange DIN rail release tab firmly to unlatch the unit from the rail. If attached to other terminal units, slide unit forward until released. For bus couplers with locking wheels, release the DIN rail locking wheel, then pull firmly on DIN rail release tab.

**Where applicable, rotate Locking Wheel to unlock Bus Coupler**

## IMPORTANT

For complete assembly instructions and compatibility between terminals see the PX-USER-M manual available for free download at [www.automationdirect.com](http://www.automationdirect.com).

## HOT SWAP NOT PERMITTED

Always remove power from the system before inserting or removing bus terminals or couplers as failure to do so could cause malfunction or damage to the terminals, couplers or other connected devices.

## WARNING

To minimize the risk of potential safety problems, you should follow all applicable local and national codes that regulate the installation and operation of your equipment. These codes vary from area to area and it is your responsibility to determine which codes should be followed, and to verify that the equipment, installation, and operation are in compliance with the latest revision of these codes.

**Equipment damage or serious injury to personnel can result from the failure to follow all applicable codes and standards. We do not guarantee the products described in this publication are suitable for your particular application, nor do we assume any responsibility for your product design, installation, or operation.**

If you have any questions concerning the installation or operation of this equipment, or if you need additional information, please call Technical Support at 770-844-4200.

This publication is based on information that was available at the time it was printed. At AutomationDirect.com® we constantly strive to improve our products and services, so we reserve the right to make changes to the products and/or publications at any time without notice and without any obligation. This publication may also discuss features that may not be available in certain revisions of the product.

## WIRING CONNECTION

Wire connection is made through a spring clamp style terminal. This terminal is designed for a single-conductor solid or stranded wire. Wire connection is made by firmly pushing the screwdriver into the screwdriver slot, inserting the wire into the wire slot and removing the screwdriver, locking the wire into position.

### Wiring Specifications

Connection Type	Spring Clamp Terminals
Wire Gauge / Wire Cross Section	28-14 AWG / 0.08 - 2.5mm <sup>2</sup>
Screwdriver Width	2.5mm (0.10) such as our TW-SD-MSL-2
Wire Stripping Length	8mm
