# CLICK PLCs
The mighty micro with a pico price.

Get Ethernet with just a simple CLICK.

The new CLICK Ethernet PLC units come with a 10/100 Mbps multipurpose Ethernet port for faster networking and control. Use the built-in Ethernet port to program your system, network your CLICK, or communicate with Ethernet-enabled devices like PLCs, HMIs, and VFDs. The new CLICK PLCs will easily integrate into existing networks and provide a simple, cost effective solution for your application.

- (1) 10/100 Mbps Ethernet port, (1) RS-232 serial port (an additional RS-485 serial port is available on CLICK Ethernet Standard PLC units starting at $149)
- Modbus RTU, ASCII, and Modbus TCP communication protocols
- 8 discrete input points and 6 discrete output points built in, capable of expanding to a total of 142 discrete or 48 analog I/O points
- FREE programming software with a simple but practical instruction set
- 2 year warranty

FREE TRAINING
Each CLICK PLC unit purchased comes with a coupon for **30 days free** *of in-depth online video training.*
